**Executive Summary**

**” Sri Lankan Government can wage a War Without Witness but can’t hide the evidences “**

The objective of this report is to document the perilous situation of civilians due to the Sri Lankan Government's indiscriminate bombardment on the civilian settlements and so called 'safety zones' in northern part of Sri Lanka. The "War Without Witness" try to gather as much as first hand verified information in this report and it fears that the situation may be far worse than what we realise due to lack of communication, threat posed to journalists & human rights activists and the facilities exist on the ground. Since the Government of Sri Lanka has banned access for all the Independent monitors, Humanitarian Workers including UN and the media, the combat zone is being isolated from the out side world and a war is waged by the Government of Sri Lanka without witness.

- The Sri Lankan Government established so called "Safe Zones" in Vanni for the civilians to move in for their security. The so called safe zone has subsequently been subjected to bombardment leading to civilian casualties. Photographic and Video evidences of the indiscriminate bombardment on the "Safe Zone" by the Sri Lankan Government Armed Forces and its consequences are documented by 'War Without Witness' in **Annex 01** and
  - Photos: <http://photos.warwithoutwitness.com>
  - Videos: <http://videos.warwithoutwitness.com>
- The UN internal documentations confirm 9,924 civilian casualties in Sri Lanka, including 2,683 killings and 7,241 injuries during the period 20 January to 07 March 2009 (**Annex 02**).
- "War Without Witness" estimate based on firsthand information obtained from Government Hospital authorities, Police and Judiciary sources in Vanni and Sri Lanka, The North East Secretariat of Human Rights, Aid workers and credible media outlets confirms more than 3,546 innocent Tamils being killed and more than 8,370 being injured by Sri Lankan Armed Forces since 1<sup>st</sup> January 2009. Total causality for the period 1<sup>st</sup> Jan 2009 to 23<sup>rd</sup> March 2009 is more than 11,916 or 148 per day. (**Annex 03**)

Innocent Tamil Civilians Killed by Sri Lankan Armed Forces since 1 <sup>st</sup> January 2009 to 23 <sup>rd</sup> March 2009		
Total Causality more than 11,916 or 148 per Day		
	<b>Killed</b>	<b>More than 3,546*</b>
	<b>Injured</b>	<b>More than 8,370*</b>
*War Without Witness Estimate based on firsthand information obtained from Hospital authorities, Police and Judiciary sources in Vanni and Sri Lanka, The North East Secretariat of Human Rights, Aid workers and credible media outlets.		

- Sri Lankan Government has banned access for all humanitarian workers including UN, independent monitors and the media to Vanni, Sri Lanka since September 2008. Consequently, "War Without Witness" is carrying out a primary data gathering exercise amongst exiled Tamil Diaspora and has collected photos and details of some of those Victims. (**Report1: Sri Lankan Government's War Without Witness Victims – Killed (with Photos)**)
- According to the verified information available to "War Without Witness" it is alarming to note that vast number of Children are victims to the indiscriminate bombardment by Sri Lankan Government Forces. (**Report2: Sri Lankan Government's War Without Witness Children Victims Killed & Injured (Name List)**)
- "War Without Witness" will continue to update this report and if you have any evidences, photos & details please email them to [WitnessDesk@WarWithoutWitness.com](mailto:WitnessDesk@WarWithoutWitness.com)

Innocent Tamil Civilians Killed by Sri Lankan Armed Forces in 2009  
War Without Witness Report  
1<sup>st</sup> Jan to 23<sup>rd</sup> March 2009

Annex 02 - UN internal documentations confirms 9,924 civilian casualties in Sri Lanka, including 2,683 killings and 7,241 injuries since 20 January to 07 March

## Civilian casualties in the Vanni

NORTH | SRI LANKA

Satellite imagery of the NFZ allows us to calculate the population and density. Based on shelter structures and head counts performed inside the NFZ, the conservative UN estimates is that there are at least 100,000 people within the NFZ.

This figure excludes an estimates 30,000 people outside the NFZ.

Snapshot of evacuated civilians

The evacuation of a total of 1,861 patients<sup>4</sup> and 928 care givers between 11 February and 05 March 2009 was performed using a ferry flying the ICRC flag that went to the No fire Zone on seven occasions. The Medical Officer in charge in Trincomalee has recorded that 708 patients major injuries and that 94 of them are children. An additional 449 suffered from minor injuries including 101 children. The remaining 704 suffered from other diseases (653 including 268 children), were pregnant (45) or died in Trincomalee (6).

<sup>4</sup> (2009) Trincomalee

Civilian casualties in the Vanni

NORTH | SRI LANKA

March 2009

Casualty figures

Total minimum number of documented civilian casualties since 20 January 2009, as of 7 March 2009 in the conflict area of Mullaitivu District: 9,924 people including 2,683 deaths and 7,241 injuries<sup>1</sup>. The number of people killed each day has doubled in one month.

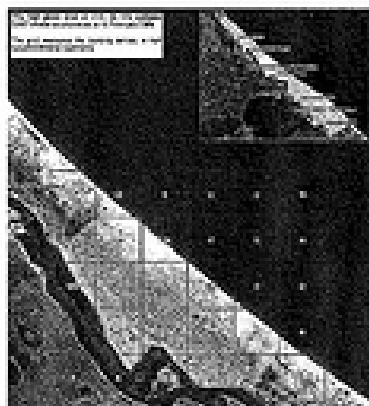

Attempts were made to indicate children under 15 years as an indicator of the presence of civilian casualties in general. Only partial figures were accumulated due to the difficulty of obtaining a constant breakdown. Nevertheless, there are at least 135 deaths, and 707 injuries since 20 January. However, like the basic casualty figure itself, this is thought to be a gross under estimate. Based on a population assumption the figure is likely to be closer to 400 deaths, and 1,100 injured. The recruitment of children by the LTTE must now be factored into the numbers of children who will perish.

Density

Between January and February 2009 the combat area was reduced from 100 km<sup>2</sup> to 45 km<sup>2</sup> <sup>2</sup> including the NFZ of 14 km<sup>2</sup>. As the combat area reduces the daily average shows an increase in the number of people killed (from 33 to 63) and a slight decrease in the number of injured (from 184 to 145). This is due to increased density, the use of heavy weapons which continue to strike the NFZ, and inadequate medical treatment.

Two thirds of the documented casualties occurred in the NFZ<sup>3</sup>.

<sup>1</sup> The ratio of deaths to injuries is estimated to be 35.5%.

<sup>2</sup> Colombo town is 49 Square Kilometres

<sup>3</sup> Between January and 11 February, the reporting network was spread over a broad area. Since most civilians are now in the small NFZ - including the reporting network - the information is better. The assumption is that casualties were greatly under-reported prior to 11 February.

## Food Delivery to IDPs in the Vanni

NORTH | SRI LANKA

- Reports indicate that only limited stock was transferred to the new NFZ and that limited food reserves that some IDPs carried onto the coastal strip are becoming depleted.
- Previous months saw IDPs spread across significantly greater areas, with agricultural land still in use and local markets more accessible to a larger proportion of the IDP caseload. The destruction of crops during the floods in December 2008, closure of banks, and the subsequent confinement of the IDP population to a coastal strip this year has highly restricted the access to locally available produce.
- A recent rapid food security review performed by WFP and covering the North indicated that the already anticipated reduced harvests from the Maha season (rain) have been lost as the people fled their land and associated livelihoods. Furthermore, the possibility for planting during the Yala season (March/April) is also unimaginable due to the current crisis. The two districts: Killinochchi and Mullaitivu are traditionally the surplus producing districts that also covered the needs of other districts (e.g. Jaffna).
- A limited market still exists for a few items (coconut, fish, etc.) though prices are exorbitant with most items beyond the reach of all but a few. Most IDP families do not have the purchasing power to access those items.
- Estimates of the caseload vary but the nutritional value of the current food delivered remains significantly low, compared to the requirements - even for the lowest figures presented.
- High congestion, lack of sanitation and access to clean water for many, and a reduced availability of firewood to facilitate food preparation and cooking will be factors that further contribute to the deterioration of health conditions.

# Food Delivery to IDPs in the Vanni

NORTH | SRI LANKA

March 2009

## Capacity

150,000 to 180,000 – number of IDPs remaining in Mullaitivu according to the UN and ICRC  
 70,000 - number of IDPs remaining in Mullaitivu according to Government of Sri Lanka (GoSL)

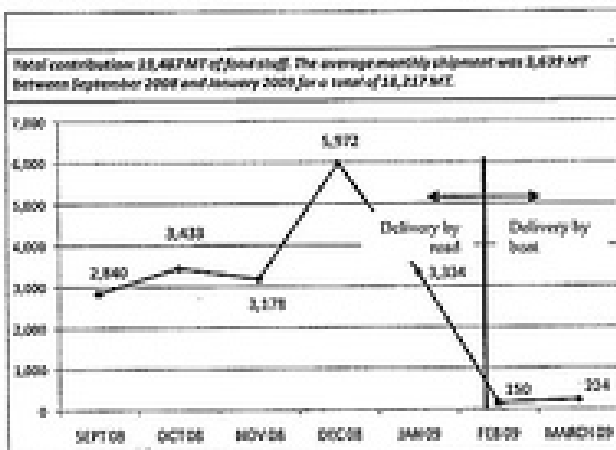

## Deliveries

18,217 MT<sup>1</sup> - total food quantity delivered by road into the Vanni between September 2008 and January 2009 (average of 3,639MT per month).

There was a gap of two weeks after the end of January.

150 MT - monthly food shipments in February 2009 by boat<sup>2</sup>. This represents 4.1% of the average delivered by road in previous months.

224 MT<sup>3</sup> - food shipments in March 2009 by boat<sup>4</sup>. This represents 7% of the monthly average delivered by road in previous months.

20,000 people – number of IDPs that current food supply supports per month<sup>5</sup> but excluding the negative effects of one month without regular delivery.

Food stocks are on standby outside the Vanni but delivery of required food to IDPs is restricted by GoSL access. The latest negotiation with the Government allowed 500 MT mixed food commodities to be dispatched, using the sea.

We need to send to the NFZ at least 3,000 MT of food per month for a caseload of 200,000 people

## Situation

- After several weeks of reports of food shortages, it's highly predicted that mortality could set in as a significant number of the IDP population is reportedly weakened and the likelihood of malnutrition across the same population group could translate into a rapid increase of nutritional and health deterioration. A recent report from Mullaitivu also stressed the seriousness of the food situation in Mullaitivu that people's nutritional condition shows significant deterioration.

<sup>1</sup> Contributions from GoSL, Indian Government, UN and NGOs - this total includes 78.4 MT through local purchase between Oct 2008 and Jan 2009

<sup>2</sup> UNF, UNCO and Government figures combined

<sup>3</sup> There has been 00 shipments to date from 27<sup>th</sup> February - this includes Government dispatched 20 MT food as well

<sup>4</sup> UNF, UNCO and Government figures combined

<sup>5</sup> Based on UNF figure of 500g per person per day
